EXPERIENCE

Tecnorise/ Mid-level Front-End Developer

04/2024 – Presente

- Responsible for the migration of systems using modern technologies such as React and Vite, improving application performance and usability.
- I migrated over 15 screens and critical functionality flows, optimizing the interface and user experience.
- Developed the complete front-end for the partner referral program, "Indicou, Fechou, Ganhou," using React to create reusable and scalable components.
- Collaborated on bug fixes and improvements for the Resident, Manager, and Gatekeeper apps, which use React Native, ensuring the stability and efficiency of user interaction and communication flows.

MERX / Front-End Developer

08/2022 – 04/2024

- Responsible for the development and updating of web and mobile interfaces for clients using React and React Native, focusing on the adoption of best practices for usability, accessibility, and performance.
- Ongoing collaboration with backend and design teams to create innovative solutions, such as the payment anticipation feature for contracts, which optimized clients' financial workflows.

- Developed an ESG Report for the quick generation of property analyses for producers, facilitating data visualization and improving clients' strategic decision-making..

IFCE Maracanaú / Front-End Developer

01/2022 – 06/2022

- Leadership in the development of an internal system using React to manage administrative and academic operations, including enrollment, grades, attendance, and scholarship management.
- Developed features for managing the academic restaurant, such as inventory control and menu management, optimizing the efficiency of operations.
- The system's implementation contributed to improving internal processes, providing greater administrative control and agility in service delivery to students and staff.
